Hello <Manager's Name>,

I would like to attend the **next GenAI Conference**, in **Orlando, Fl** from **October 7-9, 2025.**

This conference offers a unique learning opportunity. It's like three intersecting events located together, sharing keynotes, an expo hall and more, plus I can attend any sessions in the other events for no additional cost, providing a comprehensive experience. It's the perfect way to dive into multiple cutting-edge topics, connect with industry experts, and maximize learning across various sessions and workshops.

Microsoft engineers and industry experts provide a session lineup with deep dives into the technologies that I can bring to my work with cutting-edge AI, security, and IT solutions to bolster my knowledge and expand my expertise. It's also a chance for me to connect with Microsoft experts, partners, executives, and customers, allowing us to grow our network.

At next GenAI, I'll have a chance to:

- Learn how to create multiple AI agents that can collaborate on complex business tasks, automatically passing work between each other to handle processes that currently require multiple people or departments.

- Discover practical ways to integrate AI assistants into our current software and databases, with proper monitoring and management tools so my team can track performance and troubleshoot issues.

- Master techniques to improve how AI responds to requests, making it more consistent, accurate, and better at understanding context - reducing the need for human intervention and rework.

- Stay informed about the latest AI technologies available through Microsoft Azure, and learn how to evaluate which models give you the best return on investment for different business needs.

- Learn essential security practices to protect our company from AI-related risks, including preventing malicious attacks, maintaining data privacy, and ensuring

It would be best to register early, get the early bird discount which expires on **August 18, 2025,** and get the best rates on hotel rooms.

Here is an approximate breakdown of costs:

Airfare	$500
Transportation	$150
Hotel	$850
Meals (outside of conference meals)	$200
Full Conference Pass	$1,899 (until August 18th, 2025)
Total	**$3,599**

I think we can increase the value of this investment in our company by adding one or more of the pre- or post-conference workshops. These workshops provide a full-day, deep-dive experience into critical topics such as identity protocols and their practical implementation, understanding attack vectors and adopting a hacker's mindset to strengthen defenses, protecting servers and infrastructure with hands-on security strategies, and applying Azure security best practices to align our cloud environments with the latest standards and Zero Trust principles. Attending these workshops will equip us with even more practical, actionable expertise that I can apply directly to our projects and overall security posture.

Please let me know if you'd like to discuss this further. Thanks for considering my request.
