

SHAREPOINTintersection Conference
MGM Grand, Las Vegas
November 10-13, 2014

What is the business value of this conference?

We put this conference together carefully so that you'll get the most out of your time away from the office. We're not wasting your time with a lot of high-level marketing. The sessions and workshops present really useful content! You'll learn about problem solving techniques that you can implement today, including:

- How should you use the social features like Yammer in your SharePoint environment?
- Why do you need to master SharePoint Metadata, Content Types and Taxonomy to deliver the real business value you bought SharePoint for?
- Can you and should you upgrade SharePoint 2007 and SharePoint 2010 sites?
- How do you make SharePoint scale to the enterprise?
- How do you increase user adoption of SharePoint?
- Where do we start tackling SharePoint Governance?

Everything will be based on real-world experience, meaning you can relate it to and solve problems in your business environment, giving you clear and immediate return on your training investment.

Why come to *this* conference?

Unlike some other conferences, SHAREPOINTintersection speakers are all real-world consultants who are also known as top speakers in the SQL Server community, or they are members of the Microsoft product development teams. They spend their time helping businesses like yours fix or create SharePoint installations so they deliver the business value you expect. As speakers, they know how to present material so you understand and make use of it, and really are experts in the subjects they present so they are able to answer all of your questions.

At this conference, our experts not only present, but interact with you – answering questions between sessions, during lunch, and throughout the day. And, we know that even though SharePoint 2013 and Office 365 may not be your number one concern at the office; the other 50% of the conference is focused on what you're using now and where your pain points are TODAY. You'll see sessions on how to make the best of what you've got now and how to get your SharePoint strategy defined so you know where you want to go next. This is going to be THE get-your-questions-answered and architect-the-RIGHT-solutions event this fall!

SHAREPOINTintersection offers the best value of in-depth sessions and discounted hotel room rates (only \$96/night until our room block is full), in a city that is affordable to travel to and has great meeting facilities. The conference has just the right mix of existing and new technologies, fantastic speakers, a partner expo hall, networking with the community leaders, plus interaction with Microsoft and industry experts. We invite you to compare our speakers, content and package deals to other conferences. Our show offers the best ROI.

Today, tools and technologies are intersecting; our SHAREPOINTintersection conference is co-located with the DEVintersection conference and SQLintersection conference, so you can also take in sessions on Windows Azure, SQL Server, Visual Studio and ASP.NET. And, you can expand your knowledge even more with the co-located <anglebrackets/> conference featuring open web standards sessions for developers and designers who love the web. All paid attendees can cross over and attend sessions in any track for free. Over 200 sessions will be presented by industry-experts and Microsoft engineers at a fantastic venue with an expo hall, evening events, and good food during the conference!

We hope to see you there!
